

MANUFACTURING PROCUREMENT OPERATIONS

ZUUZ for Manufacturing Procurement & Ops

Approve supplier decisions and operational spend with full context — instantly.

Plant operations can't afford delays. ZUUZ provides decision-makers with the full context needed to approve critical supplier, MRO, and urgent procurement decisions in seconds, preventing costly stoppages.

<p>Zero Downtime</p> <p>Urgent approvals in seconds to keep production lines running</p>	<p>Full Context</p> <p>Every approval backed by compliance docs, quality history & budget data</p>	<p>Enterprise Secure</p> <p>RBAC permissions and complete audit logs for every action</p>
---	---	--

Three Critical Use Cases — One Unified Inbox

<p>1</p> <p>Supplier Onboarding & Compliance Approvals</p> <p>Verify new suppliers with compliance documents, quality scores, and lead-time benchmarks. ZUUZ enables rapid review and approval, cutting onboarding cycles from weeks to days.</p>	<p>2</p> <p>MRO Spend Approvals</p> <p>ZUUZ attaches budget data, vendor pricing, and spend patterns to MRO requests. Plant Managers can approve purchases based on budget fit and alternative supplier options.</p>	<p>3</p> <p>Urgent Procurement to Avoid Line Stoppage</p> <p>When production is at risk, ZUUZ flags urgent requests with real-time downtime risk, alternative suppliers, and financial impacts. COOs can approve emergency purchases instantly from any device.</p>
---	--	---

What's Inside Every Context Pack?

<p> Supplier Compliance Docs</p> <p>Certifications, insurance, regulatory filings.</p>	<p> Lead Time & Quality History</p> <p>On-time delivery, defect history, performance trends.</p>
<p> BOM Impact & Downtime Risk</p> <p>Bill of materials dependencies and production risk.</p>	<p> Budget & Spend Analysis</p> <p>Remaining budget, historical comparisons, cost variance.</p>

Act on Approvals — Safely and Securely

ZUUZ doesn't just show you information it lets you **act**. With safe write-back capabilities, approvers can update ERP fields, advance workflow approval steps, and add contextual notes directly from the ZUUZ interface. Every action syncs back to your system of record in real time, ensuring a single source of truth across SAP, Oracle, or any connected ERP platform.

Safe Write-Back Actions

- **Update ERP Fields**

Modify supplier status, PO approvals, and procurement records directly — changes sync instantly to your ERP system with full validation.

- **Approve Workflow Steps**

Advance multi-tier approval chains from any device. Sequential and parallel approval paths are fully supported.

- **Add Notes & Annotations**

Attach decision rationale, flag concerns, or request additional information — all captured in the permanent audit trail.

Enterprise-Grade Security

Role-Based Access Control

RBAC ensures every user sees only the approvals and data relevant to their role — COO, Plant Manager, Procurement Head, or Finance.

Complete Audit Logs

Every view, approval, rejection, and edit is logged with timestamps, user identity, and device metadata for full compliance traceability.

The ROI of Instant, Informed Approvals

Manufacturing leaders who deploy ZUUZ see measurable impact across three critical dimensions. By eliminating approval bottlenecks, organizations prevent costly production downtime, close procurement leakage from uncontrolled MRO spend, and dramatically accelerate supplier onboarding cycles — turning weeks-long processes into days.

85%

Downtime Prevention

Reduction in approval-related production stoppages through instant urgent procurement decisions

30%

Less Procurement Leakage

Savings from eliminating rogue spend and enforcing budget visibility on every MRO purchase

4x

Faster Supplier Cycles

Accelerated supplier onboarding with compliance docs and quality history pre-assembled
